INFORMASI PERUSAHAAN

We are a software integrator, implementator and software developer company in Jakarta. We are the developer of YBC Financial which is an ERP System, and YBC Human Capital, a Human Resource Management System. Currently we also had an implementation Project of SAP Business One, a Well-known and well-established ERP System from Germany.

I. COMPANY PROFILE

YBC SOFTWARE INDONESIA was established on 2004 by a professional, which has broad knowledge in the field of management and information technology.

The aspiration to build a company in the business of Quality and System Design by using the advance technology of IT, come from the fact that many of Indonesia's company is growing so fast without the balance of a strong management system.

At First, we are trusted to develop Property Management software for PT Metro Supermarket Realty, TBK. It marks our shifting to build a client/server application using RDBMS.

Later on, the project inspires us to build a complete package of Financial, Accounting and Production software using Borland® Delphi and Microsoft® SQL Server database. And we name it 'YBC Financial'. The software is a success, where many companies from a various lines of business, such as manufacturing, insurance, banking, distribution, retail, garment, pharmaceutical and air transportation, are implementing it nation-wide.

Continuing the success, in 2008 we release our very 'YBC Human Capital', a complete Human Resource Information System. And at the same year, it was implemented by Johnny Andrean Group consists of Johnny Andrean Salon, Bread Talk and J&Co Restaurant.

In 2009, we trusted to implement SAP Business One Application, A Well Known ERP system from Germany, in PT. Cakung Prima Steel, one of the Largest Distributor of Krakatau Steel.

What was a small-sized business has now become an industry of it's own. With the combination of capable staff with various educational-background, we determine to give our best service and product.

The best IT graduate in our development team, and the best graduate in management, accounting and finance in our implementation team. And yet, we continuously develop our Human Capital to keep up with the ever-changing world of business.

■ MENGAPA BERGABUNG DENGAN KAMI?

II. VISION & MISSION

2.1. Our Vision

To become a recognized 'Quality Oriented Company' in Indonesia, in the field of System Consultant and Business Application Software. And by harmoniously collaborating both we strive to give significant value added to our customers

2.2 Our Mission

- Commitment to Customer.

Provide the best services by focusing to customer's needs and satisfaction. We will always build good relationship, intense cooperation with customers since the beginning of preliminary survey, throughout the implementation process, until in the end handing over the products and services on time. We treat our customer as our strategic business partner that will mutually grow in each of our business.

- Commitment to Human Capital.

We believe that employee is the most valuable asset of the company, that's why we prefer the terms Human Capital. This factor ensures us to invest in Human Capital to develop aptitudes, talents, and creativity to serve the best result as well as dare to cope with challenges in order to give value added to all customers. Each and every member is given equal opportunity to optimally develop their-self. The development of a healthy Human Capital enables every workforce to delivers excellent services.

- Commitment to Quality.

We believe and hold true the concept of 'Quality Development Cycle', which depicts that only the one who has quality is able to reproduce quality. We prefer prevention rather than correction and always do the right things from the beginning, to bring customer satisfaction. In the end this Quality attitude will fulfill our liability to the stakeholders

- Commitment to Growth.

Every single healthy company must grow and obtain profit. In our point of view, profit is customer's appreciation upon our products and services. Besides being the interest of the stakeholders, profit will strive us to a continuous grow to keep up with the world's remarkable transformation.
